

Our Charter

BANKS Renewables
development with care

OUR MISSION WILL BE:

- To maximise the benefits available from each of our wind farms for local people and for the local economy.
- To create new employment, training and/or education opportunities for local people.
- To directly support local businesses by encouraging them to join the Banks Renewables supply chain.
- To support the establishment and work of local Community Advisory Panels for Banks wind farm projects, whose role will be to identify and advise on local good causes and charities for grant making purposes.
