### Douglas Valley Landscape Enhancements

We will enhance the designed landscape which surrounds the remains of Douglas Castle

LINKS TO THE HAGSHAW CLUSTER & COALBURN

### Peat Bog Restoration

We will manage and restore areas of peat bog both on and offsite

### Upland Birch Scrub

Restoring upland birch scrub which plays an important role in Scotland's eco-systems and will benefit key species like Black Grouse.

### Heather Restoration

Heather moorland restored both on and off-site, a key habitat for iconic local species

### Native woodlands

We will plant new areas of native woodland along the edges of existing conifer plantations

### Enhanced Access & Robertson Drove Roads

We will introduce and upgrade existing paths to provide a network of high quality, multi-user paths

### Community Land

We will help local people take control of land to be used for the benefit of the community

### Commercial Forestry

We will remove several small plantations of Sitka spruce from the landscape around Robertson
